

SCRIPT:

ESC Script for FSET Referrals

1. I want to make you aware of a program called the FoodShare Employment and Training program, or FSET program.
2. The FSET programs in Wisconsin offer a wide variety of employment search and training services.
3. Services provided may vary around the state but in general, the following services are available:
 - Help in developing an application and resume;
 - Providing job leads and other kinds of job development assistance;
 - Provision of some supportive services such as transportation or child care; or
 - Assistance that would support training at local technical colleges;
 - Internet access to look and apply for jobs on-line;
 - If employed, provide assistance or training to help improve job security or increase wages.
4. The FSET agency in your area may not have all of the services that I just listed but it would be worth your time to make contact with them.
5. Would you be interested in having someone from your local FSET agency contact you?
6. Information about FSET is sent to everyone. Persons who indicate they are interested in FSET at this time will be placed on a priority list for contact.
