

Children’s Long-Term Support Functional Screen

Diagnoses Cue Sheet

This alphabetical list of diagnoses indicates which box screeners should check on the Diagnoses table of the Children’s Long-Term Support Functional Screen (CLTS FS). For every diagnosis, the screener should:

1. See if it is listed in the CLTS FS Diagnoses Table and check relevant box on the table. Use the Search icon to help find the condition you are seeking.
2. If not on the CLTS FS Diagnoses Table, look for it in this Diagnoses Cue Sheet. If present here, check the box (es) on CLTS FS Diagnosis Table as indicated here. Also list the name of the specific condition/syndrome/diagnosis in the note section on the Diagnosis page.
3. If the diagnosis is not listed in this Cue Sheet, then check Diagnoses Table “Other,” and write it in.
4. Do not write in a diagnosis in “Other” until after making sure it is not on this Cue Sheet.
5. Do not guess which diagnoses on the CLTS FS diagnosis table to check. (See instructions.)

Screeners should ignore letters or numbers before or after diagnoses. You can also ignore the following adjectives appearing before or after diagnoses:
