

Wisconsin Reporting System for APS:WRAPS

Introduction to the Statewide APS Reporting System (WRAPS) for APS Staff
March 2024

Meet our DHS APS WRAPS Team:

Cindy Ofstead, BADR Director of Office on Aging

Conner Jensen, BADR, APS Data Analyst

Gena Schupp, BADR, APS Coordinator

Laurie Kohler, BADR, APS Program and Policy Specialist

Introduction to the APS Reporting System: WRAPS

- Overview and need for APS reporting system
- County and state roles with APS reporting system
- WRAPS transition plan
- WITS update needs and project
- WRAPS program enhancements
- Key content changes between WITS and WRAPS
- Enrollment and access to WRAPS
- Criteria for WRAPS reporting
- Best practice recommendations for WRAPS
- Review of WRAPS content

Why is APS Data Important?

Data helps us understand the prevalence of abuse, neglect, and financial exploitation in Wisconsin.

There is statutory requirement for DHS to collect data: Wis Stat § 46.90(8).

Data is used for an annual report about the statewide APS system.

DHS provides data to the National Adult Maltreatment Reporting System (NAMRS).

Roles with APS Reporting System: **County**

- Each county is required to identify a lead elder-adults-at-risk (EAAR) agency for adults ages 60 and over, and an adults-at-risk (AAR) agency for adults ages 18–59.
- County APS units are responsible for responding to reports of abuse, neglect, and financial exploitation of adults at risk.
- The counties determine how to proceed with referrals and investigations.
- Counties are responsible for reporting data on APS referrals and the outcomes of investigations.

Roles with APS Reporting System: **DHS**

- DHS does not receive or respond to APS reports.
- DHS's role is to develop and maintain the data reporting system.
- DHS does not receive personally identifiable information entered by county APS staff.
- Data in the Wisconsin reporting system is used to create statistical summaries.

APS Reporting System Transition Plan

- **2023** APS referrals entry is due by 3/31/2024.
 - Enter data in WITS.
 - Complete financial abuse spreadsheet.
 - Send Emergency Protective Placement data to DHS.
- **2024** APS referrals will require entry into WRAPS.
- The interim plan between 1/1/2024 and WRAPS go-live (spring 2024) requires counties to maintain local data.
 - 2024 data reported into WITS **will not transfer** to WRAPS.
 - WRAPS forms distributed for local data collection.

Why is WITS Retiring?

The Wisconsin Incident Tracking System (WITS) was developed in 2006.

It was built on an Internet Explorer platform. This is now outdated technology.

WITS is proprietary software and elements cannot be modified or customized.

Wisconsin received federal American Rescue Plan Act (ARPA) grant money to fund a new reporting system.

WRAPS Program Enhancements

New user roles

More real-time data

Overview of Content Changes from WITS to WRAPS

- All clients referred to as adults at risk
- Simplified categories of concern for referrals with additional details entered in the investigation results section
- Investigation results changed from “substantiation” to whether the AAR has been hurt or harmed
- Updated choice of gender and race reflective of current cultural practices, with modifiers regarding how this information was collected

Overview of Content Changes from WITS to WRAPS, cont.

- Additional fields regarding financial abuse, which will eliminate the need for separate tracking
- Additional fields for narrative that are optional and can provide information for local use

Criteria for Reporting into WRAPS

What gets reported into WRAPS:

- Counties should enter data for all APS referrals their agency has received and responded to.
- An APS report includes:
 - A concern of abuse, neglect, or financial exploitation.
 - A subject that is an adult at risk or elder adult at risk.
 - A matter that requires an APS response.
- Eligible settings include both community dwellings and residential facilities.

Criteria for Reporting into WRAPS, cont.

What does not get reported into WRAPS:

- “Screen outs”—referrals that do not meet requirements of an aps report:
 - The person referred is not an AAR or EAR.
 - The concern does not meet criteria for abuse, neglect, or financial exploitation.
- Calls in which a person is only calling for general information and not APS investigative response
- Reports in which there is incomplete information to start a referral
- Referrals that do not require APS response or have an aps role

Best Practice Recommendations for WRAPS

- Counties may consider new user roles for efficient data entry.
- Counties should enter data into WRAPS at the time of case closure. (*When the case WRAPS up...*)
- To improve quality assurance with consistent data entry, the WRAPS incident number should be included into local record system.
- Supervisors and managers should use the newly created reporting tools that will capture real time local data.

WISCONSIN ADULT-AT-RISK APS DATA REPORTING

Instructions: This form is for county and tribal APS workers in preparation for release of a new web-based APS reporting system, replacing the Wisconsin Incident Tracking System (WITS). APS staff are statutorily required to enter data on local APS incidents into the reporting system developed and managed by DHS. This form is intended to be a tool for local use only. Its purpose is to assist APS staff in gathering information required for reporting into the DHS reporting system. This form contains confidential personally identifiable information. Please protect client privacy by storing securely; do not share or forward this form to DHS. Please direct any questions to: DHSAPS@dhs.wisconsin.gov.
