

Upcoming Non-Project Enhancements

IMAC Presentation

October 2022

Fixing FoodShare Logic to Disregard SSI-E Income for Eligibility

- CARES will be enhanced to disregard the SSI-E income type (SISE - EXCEPTIONAL EXPENSE SUPPLEMENT) when determining FoodShare eligibility.
- On the Unearned Income page, the “SSIE Expenses” field will remain disabled when the SSI-E income is selected as the income type.

Disabling Alerts Concerning the Transition of SeniorCare Cases

- The option to transition SeniorCare cases is no longer needed since there are no longer any non-SeniorCare mainframe cases to transition to web.
- The banner message that suggests workers should use the Transition option for mainframe cases and one that suggests the “Transition Mainframe Case to Web Case” option on Case Summary page will be disabled.

Fixing Health Care Eligibility Logic for Incarcerated Persons

- Currently, applicants who are incarcerated are being found ineligible for Medicaid solely due to their income exceeding the Medicaid medically needy income limit.
- The enhancement will allow incarcerated persons to become eligible for suspended Medicaid by meeting the Medicaid deductible.

Updating FSET Categories for FNS Reporting

- One activity titled “Self-Employment Preparation (SE)” will be renamed “Self-Employment Training (SE).”
- Two new FSET activities will be available in the FSET Tool:
 - Job Search Training (JT)
 - Integrated Training or Bridge Program (BR)
- More detail found in the October 14th Ops Memo.

Systematic Issuance of Forms Concerning Spousal Impoverishment

- This enhancement will reduce or even eliminate the need for workers to fill out these forms using the Manual Letter Generation page.
- CARES will be enhanced to send the following forms systematically:
 - Medicaid Income Allocation Notices. There are two versions of this notice:
 - Institutional Medicaid Income Allocation Notice (F-10097) and
 - Community-Based LTC Services Medicaid Income Allocation Notice (F-10097A)
 - Medicaid Member Asset Allocation (F-10098)
- Note F-10098 is being revised, and the corresponding PDF output from the Manual Letter Generation page (NMAA) will also be updated to match the revised form.
