

WISCONSIN 2014 BLOOD LEAD TESTING DATA FOR CHILDREN LESS THAN 6 YEARS OF AGE

Source: Wisconsin Blood Lead Testing Data (data current as of June 2015)

Tested: Number of unduplicated children receiving a capillary or venous blood lead test during 2014, or their first test of 5 micrograms per deciliter (mcg/dL) or above. If a child had a venous test within 3 months of a capillary test, the date, place and result from the venous test was used.

Tested 5 mcg/dL or above: Number of unduplicated children who had a capillary or venous blood lead level of 5 micrograms per deciliter (mcg/dL) or above. If the test was a capillary sample followed within 3 months by a venous test, the date, place and result of the venous test result was used.

Rate: Number of children who tested 5 mcg/dL or above, divided by the number of children tested.
