Tdap (1): 1 or more doses of tetanus-diphtheria-acellular pertussis vaccine among adults aged 19–64 years.

HPV Complete: 2 or 3 doses (depending on age at vaccine series initiation) of the human papillomavirus vaccine (HPV) among adults aged 19-26 years old. The Advisory Committee on Immunization Practices changed their HPV recommendation from a 3 dose series to either a 2 or 3 dose series depending on age at vaccine series initiation. Prior to 2017, HPV complete rates reflect a 3 dose series.

Zoster (Shingles) Complete: Beginning in 2018, Zoster (Shingles) Complete represents individuals 50 years and older who have received two Shingrix vaccine doses. Prior to 2018, Zoster complete rates reflect individuals 60 years and older who received one Zostavax vaccine. The Advisory Committee on Immunization Practices changed their Zoster recommendation at the end of 2017 from one Zostavax dose for individuals 60 years and older to two Shingrix doses for individuals 50 years and older regardless of prior Zoster vaccine receipt.

Pneumo Complete: 1, 2 or 3 doses (depending on trade name) of pneumococcal vaccine among adults aged 65 years or older. The Advisory Committee on Immunization Practices changed the pneumococcal vaccination recommendation in 2022. This rate reflects completion based on that recommendation in 2022.

HepA UTD: 2 or 3 doses (depending on trade name) of Hepatitis A vaccine among adults aged 19-49 years old.

HepB UTD: 2, 3 or 4 doses (depending on trade name) of Hepatitis B vaccine among adults aged 19-59 years old.

†Due to a change in methodology, 2023 data is not comparable to previous years. Before 2023, individuals who were reported with a non-Wisconsin address and deceased individuals were excluded from our calculation of coverage rates. Starting in 2023, the exclusion criteria was expanded to provide a more accurate population denominator by removing individuals whose records have not had activity for an extended period of time and therefore may no longer reside in Wisconsin. The additional excluded records were clients at least 11 years old, whose records were not updated in at least 10 years, and not queried in at least 5 years.

*Prior to 2022 City of Racine data included the municipalities of Racine, Village of Elmwood Park, and Village of Wind Point. Beginning in 2022 City of Racine data includes only the municipality of Racine. Cities were included if they had their own city local health department.

Region abbreviations: W = Western, N = Northern, NE = Northeastern, S = Southern, SE = Southeastern.
