

2023

Calendar Year Report on Opioid Treatment Programs in Wisconsin

**WISCONSIN DEPARTMENT
of HEALTH SERVICES**

P-02115-23 (06/2024)

Introduction

Opioid treatment programs provide services under 42 Code of Federal Regulations, Part 8. An opioid treatment program is an accredited treatment program with Substance Abuse and Mental Health Services Administration certification and Drug Enforcement Administration registration to administer and dispense medications that are approved by Food and Drug Administration to treat opioid use disorder. Currently, these medications include methadone and buprenorphine products. Other pharmacotherapies, such as naltrexone, may be provided but are not subject to accreditation and certification regulations. Opioid treatment programs must provide adequate medical, counseling, vocational, educational, and other assessment, and treatment services either on-site or by referral to an outside agency or practitioner through a formal agreement.

2023 Data Summary

This report provides one-page summaries for each opioid treatment program that operated in Wisconsin during calendar year 2023. The one-page summaries include the data points required to be reported under Wis. Stat. § 51.4223. All opioid treatment programs also complied with requests to provide additional data.

In 2023, the 26 opioid treatment programs in Wisconsin served 11,584 patients, with 11,544 people served at clinic locations and 40 people served at mobile medication units. Of the total patients served in 2023, 1,883 received concurrent behavioral health services.

This report shows patients who were in treatment one or more days of calendar year 2023. It is not a census report.

Patients Served by County

County of Residence	Patients Served	County of Residence	Patients Served	County of Residence	Patients Served
ADAMS	43	KENOSHA	324	ST CROIX	6
BARRON	28	KEWAUNEE	15	SAUK	108
