

Free and **available** for all Wisconsin pharmacies to access!

Sign up your pharmacy to use the Wisconsin Immunization Registry (WIR)!

Wisconsin Immunization Registry

Access patients' records: Allow pharmacists to see what immunizations patients have received.

Recommend immunizations for your patients: See what immunizations should be administered.

Record immunizations patients received: Enter patients' immunization data into WIR, which then tracks immunizations given at different clinics and pharmacies around the state.

Provide team-based care: Empower all health care providers to access the same immunization data to coordinate care, which improves patient and population health.

Create reports: Generate various documents to help your pharmacy measure their immunization rates.

Step 1

Reach out to the WIR team by calling 608-266-9691 or emailing DHSWIRHelp@dhs.wisconsin.gov.

Step 2

Once approved, prospective users will receive training.

Step 3

Upon completion, pharmacy staff will have access to WIR.

3,700 providers and 2,400 schools and school districts across Wisconsin have implemented WIR into their daily workflow, and we are looking to expand provider usage of WIR throughout the year.
