

SIGNS OF AN OVERDOSE

Unresponsive or unconsciousness

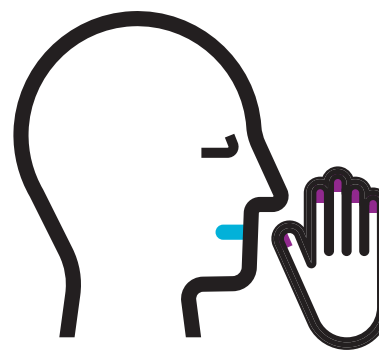

Slow or absence of breathing

Snoring or gurgling sounds

Cold or clammy skin

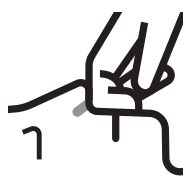

Discolored lips or fingernails

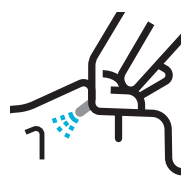

HOW TO ADMINISTER NARCAN®

Call **911** and follow the instructions they give you.

Place tip of nozzle in either nostril until your fingers touch the nose.

Press the plunger firmly to release the dose of NARCAN®.

If there is no response after 2-3 minutes, give a second dose.
