

Staying up to date with COVID-19 vaccines

You are up to date with your COVID-19 vaccines when you have completed a primary series and, when eligible, received the most recent booster dose recommended for you.

A **primary** vaccine series is the initial number of doses of a vaccine that a person needs. Everyone 5 years and older needs an updated **booster** dose because they boost your immune system after your initial protection naturally wears off over time.

COVID-19 vaccination schedule for most people

Children 6 months
-4 years old

Moderna

-OR-

Pfizer

Children 5-11
years old

Moderna or Pfizer

Already got booster doses? You should still get an updated booster! Learn more at dhs.wi.gov/covid-19/vaccine-booster.htm

People 12 years
and older

Moderna, Novavax, or Pfizer

Can't get a Pfizer or Moderna booster? People ages 18 years and older may receive a Novavax booster dose at least 6 months after completing a primary series if they have not received any previous booster doses.

People 18 years and
older who received
Johnson & Johnson

COVID-19 vaccination schedule for people who are moderately or severely immunocompromised (have a weaker immune system)

People are considered to be moderately or severely immunocompromised due to several types of conditions and treatments that weaken the immune system. For example, due to cancer treatment, HIV infection, or a medical condition like DiGeorge syndrome. Learn more at www.dhs.wisconsin.gov/covid-19/vaccine-immuno.htm

Children 6 months-4 years old

Moderna

Pfizer

-OR-

People 5 years and older who received Moderna or Pfizer

People 12 years and older who received Novavax

People 18 years and older who received Johnson & Johnson

Layer your protection

People 12 years and older can get an additional layer of protection against COVID-19.

[Evusheld](https://www.fda.gov/medical-products/medwatch/medwatch-article-006222) is a medicine that can help you prevent getting COVID-19.

www.dhs.wisconsin.gov/covid-19/treatments.htm

Pfizer, Moderna, or Novavax COVID-19 vaccines are preferred over Johnson & Johnson's COVID-19 vaccine [in most situations](#).
