59%

People in CIE who are not receiving supported employment services

5,136

Unique working age people in CIE

+

85

People in CIE over the age of 65

When people with disabilities work, they provide substantial economic benefits to local communities.

Working benefits people with disabilities by increasing quality of life, improving self-confidence, bettering social life, and expanding sense of community.

By encouraging more members and participants to engage in CIE, work benefits are realized by more people and communities.
