

Wisconsin Lead-in-WTR Initiative

Information for licensed family centers

What is this program?

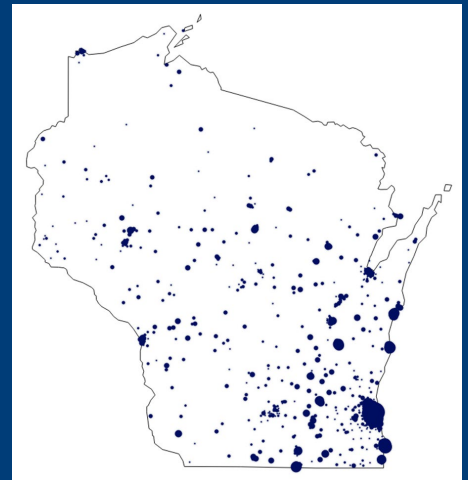

This is a free, Wisconsin Department of Health Services program that helps licensed family centers in our state reduce drinking water hazards in their buildings. We provide:

- **Free** testing of all water fixtures!
- **Free** replacement of water faucets!

Why should childcare centers participate?

-  Infants and young children can be exposed to lead through drinking water.
-  Testing water is quick and easy.
-  We will help you fix any problems found.
-  375 Wisconsin childcare centers have already participated!

Instances of childhood lead poisoning (2018–2021)
